Pivotal

Welcome!

Core Spring

Logistics

- Instructor introduction
- Students introductions
- Course registration
  - If needed
- Courseware
- Internet access
- Phones on silent

- Working hours
- Lunch and breaks
- Toilets/Restrooms
- Fire alarms
- Emergency exits
- Any other questions?

Pivotal

How You Will Benefit

- Learn to use Spring and Spring Boot for web and other applications
- Gain hands-on experience
  - Generous mixture of presentation and labs
- Access to experienced, certified instructors

Pivotal

Agenda

- **Course Contents**

- Spring and Pivotal

Pivotal

Course Agenda: Day 1

- Introduction to Spring
- Using Spring to configure an application
- Java-based dependency injection
- Annotation-based dependency injection and component-scanning
- Spring FactoryBeans

Pivotal

Course Agenda: Day 2

- Inside the Spring Container
  - Bean Lifecycle and its related Post Processors
- Adding behavior to an application using aspects
- Testing a Spring-based application using multiple profiles
- Simplifying JDBC-based data access
- Driving database transactions in a Spring environment

Course Agenda: Day 3

- Getting Started with Spring Boot
- Spring Boot Auto-Configuration
- Using JPA and Spring Data Repositories
- Building a Spring MVC Application

Pivotal

Course Agenda: Day 4

- Implementing a Complete REST Server
- Securing web applications with Spring Security
- Implementing OAuth2-based Security with Spring
- Spring Boot Actuators
- Spring Boot's Testing Support
